Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 16, 17, 22-27, and 32-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Sin (7,227,583).

Regarding claim 16, Sin discloses a digital television showing a data parsing unit 23 and database 24 for receiving linkage descriptor information, which meet the detection means as claimed. The linkage descriptor information includes change date and time of a physical channel (col. 4, lines 53-55), a channel to be switched (col. 5, 55-63) and a searching operation (col. 5, lines 14-21). Although Sin does not explicitly mention that the descriptor includes date information, it is inherently included since the information is part of the electronic program schedule.

Regarding claim 17, in addition of above, the database 24 meet the first storage means as claimed.

Regarding claims 22 and 23, please see col. 6, lines 15-21.

Regarding claims 24 and 25, the database 24 is constantly being updated.

Regarding claims 26, 27, 32-35, in addition of above, the video/audio decoder 25 or the video/audio processing unit 28 inherently includes some memory means for storing or retaining the video and audio signals for processing. The memory means can be a frame memory, a buffer memory, or a hard drive. Therefore, the inherently included memory means meets the recording device as claimed.

Allowable Subject Matter

3. Claims 18-21 and 28-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kessler et al. (6,621,528) shows a digital television with autoprogramming function.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.
